

QUALITY AND ENVIRONMENT POLICY

Polymark is present in the national and international markets, markets that are increasingly demanding as to the quality of products and services.

Being aware of the need for continuous improvement of the quality of its processes, products, services and of our environmental performance, Polymark's management commits itself to maintain a Quality and Environment Management System, based on the following key principles.

- Ensure that the requirements of the NP EN ISO 9001 and NP EN ISO 14001 are achieved.
- Regularly monitor and identify its internal procedures, processes, and practices with a view to continuous improvement of the Quality and Environment Management System.
- To strengthen the internal organisation and resource management procedures in the constant search for improvement in the company's efficiency.
- To promote teamwork and team spirit, initiative, and the recognition of the importance of employees as fundamental elements for the company's competitiveness.
- Ensure the motivation of all employees, investing in their training and the adoption of environmentally correct behaviours.
- Focus on meeting the expectations of customers and other parties involved to ensure viability and economic success.
- Comply with applicable legal requirements and compliance obligations, implementing measures aimed at preventing pollution.
- Adopt environmental protection measures, through the control of environmental aspects.
- Strengthen synergies with the best suppliers, to guarantee customers the best solution and the best quality/price ratio.

In this way, through the quality of its products and services, Polymark will be able to achieve the desired success and guarantee a solid position in the markets where it has business.
